FRONT END DEVELOPER

Experienced Front-end Developer with over 2 years in the field. I specialize in creating user-friendly websites, making sure they're easy to use for everyone. Proficient in HTML, CSS, and JavaScript, I love using modern tools like React JS and Astro. I'm passionate about keeping up with the latest trends in web development to ensure my work is always fresh and on point. With a focus on SEO and strict adherence to web standards, I bring creativity and accessibility to each project.

KEY COMPETENCIES

HTML, CSS, JS	GitHub	Web Standards
React JS / Next JS	Firebase	Accessibility (a11y)
Astro	JSON / APIs	SEO Best Practices
TypeScript	Figma	Photoshop / Illustrator

PROFESSIONAL EXPERIENCE

Casivu   **February 2024 - Present**
Front End Developer

- Led the creation of an e-commerce platform from scratch, using React, Shadcn/ui, and Firebase.
- Introduced TypeScript into the project and assisted colleagues in adopting it, enhancing code reliability and developer productivity.
- Worked closely with teammates to design and build smooth, fast features for users.

Siemens Digital Industries Software   **September 2023 - February 2024**
Software Diploma - Full Stack Web Development

- Gained comprehensive software development insights during the intensive 5-month Diploma.
- Acquired knowledge and practical experience in algorithms, data structures, backend development using Java Spring, and frontend development with Angular.
- Explored essential skills including Linux proficiency, version control using GitHub, application of SOLID principles, coding best practices, and participation in code reviews.
- Developed expertise in performance and optimization techniques, understanding build systems, system design, UX design principles, software development lifecycle (SDLC), databases, and microservices.

X-Codify   **November 2023 - January 2024**
Mentor - MERN Stack

- Trained students on the entire MERN (MongoDB, Express.js, React.js, Node.js) stack.
- Guided individuals through the intricacies of full-stack development.
- Enhanced communication skills in explaining complex concepts effectively.
- Solidified commitment to empowering aspiring developers with practical skills.

NEAR   **August 2022 - January 2023**
Front End Developer

- Transformed concepts into reality during a 6-month tenure with NEAR in Arabic.
- Showcased expertise in blockchain, smart contracts, and developing database dashboards.
- Developed and deployed multiple projects, earning recognition as the top performer in a team of 6.
- Continued contributions as a part-time employee for an additional 3 months, delivering 5 websites focused on blockchain technology, smart contracts, NFTs, and database dashboards.

Freelance   **August 2021 - Present**
Front End Developer

- Engaged in diverse projects over the past two years, tailoring solutions to meet clients' requirements.
- Specialized in front-end development, creating user-friendly websites for seamless user experiences.
- Collaborated closely with clients, translating their visions into effective digital solutions.
- Strengthened versatility, adaptability, and problem-solving skills within the dynamic field of web development.

FEATURED PROJECTS

Techflow Pro (Live - GitHub)
Open Source - React JS - TypeScript - TailwindCSS - Design System

- Open-source ReactJS project, TechFlow Pro, demonstrating design and development skills.
- Serves as a landing page for a fictional SaaS company, integrating TypeScript, TailwindCSS, and a custom design system.
- Features include dark mode, responsive design, and optimized SEO, showcasing a commitment to high-quality, accessible, and performant web solutions.

FCIS2023 (Live)
React JS - Firebase - Admin Dashboard

- Robust content management system, FCIS2023, simplifying access to essential university materials for computer science students with 50,000+ monthly views.
- Initial development in 2020 using HTML, CSS, and JS, followed by significant enhancements in 2021 with a transition to ReactJS and Firebase.
- In 2022, the project evolved with the addition of an admin dashboard and role-based access, optimizing content management and garnering usage by over 1000 students.

Stiqa Store (Live)
E-Commerce - React JS - Typescript - Firebase - Admin Dashboard - A11y First

- Dynamic e-commerce platform, Stiqa Store, dedicated to sticker sales for a small business.
- Exceptional user experience on desktop and mobile devices achieved through ReactJS, SASS, and Firebase.
- Key features encompass a seamless shopping cart and checkout system, an intuitive admin dashboard for product management, and a secure user authentication system.

EDUCATION

Faculty of Computer and Information Sciences (FCIS) - Ain Shams
Bachelor of Computer Science (August 2023) - 3.1 GPA
